Q1	Assessments reflected what was taught in class	18	9	2	1	8.80
Q2	Feedback on assignments was timely and useful	18	9	2	1	8.80

Open-Ended Student Comments

1. The teacher was excellent & made a hard subject enjoyable. The < pipeline > simulations really helped me understand hazards.
2. More numerical practice problems before the CIA exams would help a lot.
3. Sometimes the pace was too fast in the addressing-modes unit; a recap session would be great.
4. Loved the hands-on labs. Please give us more time for Q&A at the end of each class.
5. Very approachable and always ready to clarify doubts even after class hours.
6. The projects were tough but I learned the most from them. Would recommend keeping them.
